# ***BODE MEDIUM DUTY COLUMN PRECISION AND PERFORMANCE***

**Model 3/TRMB 4 m x 5 m**  
Tracked unit with rotating column.

**Model 3/TRMB 5 m x 4 m**  
Set-up for seamless pipe  
welding using submerged arc  
welding unit.

**Model 3/TRMB**  
Utilised as shown in stainless  
steel container welding role.  
Container carried on Bode  
SAR 1200 Rotators.  
Remote control master station.

# & BOOM MANIPULATORS FROM EVERY ANGLE

Model	Min. Height under Boom (mm)	Max. Height under Boom (mm)	Overall Height (mm)	Boom reach (mm)	Boom Travel speed (mm/min.)	Max. Load (kg)

# YOU'LL NOTICE THE DIFFERENCE WITH BODE

Globally the Bode range of Column & Boom Manipulators stands out not only for innovation in design and quality of manufacture, but also for reliability and robustness.

- 360° column rotation with manual locking at any position.

- Free standing or variable speed travelling carriage.
- Optional fittings, including welding heads, available.

Whatever your need Bode will have the answer. Just talk to us, and remember, Bode also makes other ranges of Column & Boom Manipulators from portable to ultra heavy duty models.

- Variable speed boom.
- Boom elevation through geared motor rack and pinion drive with elektro-magnetic brake.
- Elevation and traverse drive mounted on saddle providing for easy access servicing and maintenance.
- Machines fully counter-balanced by column internal weight, connected to the saddle by heavy duty wire rope. Anti-fall device offers full safety feature.
- Extra wide rollers and unique slideways ensure minimum deflection traversing.
- Innovative machined 'V' ways to column ensure that the boom saddle moves smoothly with no vibration. This reduces wear and tear.
